

P4 Home Learning Grid – Autumn Term (until October)

Reading: Try to read for fun for a short while every day. You could read comics, picture books, information books or magazines. Why not make a book den, take a picture of your den and share it with the class.

French: Try out some of the games on:

<https://www.frenchgames.net/frenchgames>
<https://www.linguascope.com/log-in.php>

Username: leithpri

Password: pinkpanda58

Numeracy: Practise counting forwards and backwards in 2s, 5s, 10s. For a challenge try 3s and 4s. Have a go at some of the mental maths games on Sumdog!

Maths: Shape hunt! Look around your house for 3D shapes or look in newspapers or magazines. How many faces and edges does each shape have? Here is a link to help you learn about 3D shapes:

<https://www.bbc.co.uk/bitesize/topics/z>

Social Studies: Think of a country that has a different climate from ours. Write / draw some interesting facts about the weather in your chosen country. Is it icy cold with strong winds? Is it hot and humid?

Writing: Look for something in nature (a tree, leaves, animal) and write about it in any way you choose. How many different describing words (adjectives) can you use?

STEM: Can you design and make a rain gauge? Use it to measure and record how much rain falls in one week. Have a look online if you need some design ideas.

Art and Craft: What is your favourite type of weather? Create a piece of art to show us. It could be paint, chalk, collage - you choose!

Outdoors: Go on an Autumnal walk and collect as many fallen leaves as you can. Sort them by shape, tree type, size, or colour and take a photo / draw a picture of your work.

We can't wait to see your work! Please bring into school or upload to Learning Journals by Wednesday 8th October 2025.

MATHS KEY WORDS

2D 3D side face edge vertex
base angle tiling symmetry

INTERDISCIPLINARY LEARNING KEY WORDS

climate environment Global Goals
global warming climate change
